

COURSE OVERVIEW

This part-time 2-year Master is aimed at graduates and teachers who wish to improve and update their professional skills and abilities as teachers of English as a Second Language.

It includes face to face teaching, a blended learning component, autonomous study and project work.

The course is module-based and will be taught exclusively in English. Students are required to take 8 modules: 6 compulsory and 2 of their choice (see Table). Each module analyses issues in the teaching of English from both theoretical and practical perspectives.

The compulsory modules will cover the main theories in second language acquisition, provide the skills necessary for the management of a dynamic modern classroom and introduce new approaches and methodologies in the teaching of English as an international language.

Course participants will be able to personalize their studies by choosing two of the optional modules which best suit their interests and needs.

Teacher Training will be an integral part of the course, providing participants with the opportunity to reflect and put knowledge and skills acquired into practice.

In addition to this, seminars will be held by visiting scholars throughout the course.

COURSE MODULES

1. ENGLISH TODAY	COMPULSORY
